

Sangre de Drago

The Rainforest Super Antioxidant

Sangre de Drago - One of the World's Richest Sources of Antioxidants

Whether it's cuts, scratches, bruises or inflammation - **Sangre de Drago** is ready to come to the rescue!

Just apply a little to your cut, bruise or inflamed area and the rich antioxidants in Sangre de Drago will start working their magic - accelerating the healing process so you can get back out there and live your life!

sangre de drago

"I recommend it (Sangre de Drago) to my patients for daily use as an antioxidant and immune booster."

- James Hawver, NMD, Bremen, GA

The Strongest Solution for the Fastest Relief

- Rich source of proanthocyanidins*
- High antioxidant activity*
- Promotes collagen production and skin health*

Sangre de drago reigns among the most legendary botanicals from the Amazon Rainforest. For centuries, the sap of sangre de drago has been painted on wounds by Indigenous people to help stop bleeding and accelerate healing.*

The Sangre de Drago tree grows between 30 and 100 feet tall, deep in the Amazon Rainforest. When the surface of the tree is punctured, it "bleeds" a blood-red sap...which led to the name Sangre de Drago (or "Dragon's Blood").

"Sangre de Drago has helped immensely with reducing and relieving my varicose veins. They troubled me for over 20 years. After 10 days of taking this herb, my varicose veins went way, way down in size and, by now, all of them have just about disappeared."

- Mark-Paul Goodman, Capitola, CA

The Anatomy of "Dragon's Blood"

Widely used in the Rainforest for its ability to assist skin regeneration and the health of body tissue, the dried sap of the sangre de drago tree contains 90% proanthocyanidins

(OPCs).¹ Proanthocyanidins are the most potent dietary antioxidants known.

The sap is also rich in an alkaloid called "taspine," which is said to be helpful in healing wounds rapidly and putting an end to bleeding.

"In addition to the proanthocyanadins and taspine," says Dr. James Duke, former USDA head botanist, "there's another active ingredient -

dimethylcedrusine. While each of these alone was shown to effectively heal [wounds] the whole dragon's blood was shown to speed healing four times faster. The whole was better than the sum of its parts. Synergy makes the whole herb stronger; diversity makes the rainforest stronger."

Our Sangre de Drago is a proprietary blend of Sangre de Drago sap and bark.

Promote natural anti-aging processes in the body with this Rainforest super antioxidant!

Sangre de Drago™ is available as:

Liquid (8 oz)	\$89
Liquid (1 oz)	\$21
90 ct. Liquizons	\$55
