

# Clean & Green™ – Frequently Asked Questions

## Why is Clean & Green only sold in small bottles?

Clean & Green is available in a 4 ounce concentrate. A little goes a long way, so this size bottle is very economical. Normal dilution ratio is 1 ounce of Clean & Green for every 16 ounces of water. Clean & Green can also be purchased in a 6-pack, which includes 2 spray bottles.

## What are some common uses for Clean & Green?

Clean & Green has many uses around the house:

- It is ideal for cleaning fresh vegetables and fruits to get rid of agricultural residues.
- It is very effective for treating stains on carpeting and clothing.
- Use a light solution spray to clean glass and mirrors.
- Let it soak for a few minutes to take tea or coffee stains out of cups.
- It is effective as a spray for cleaning countertops in kitchens and bathrooms.
- It is great for cleaning tile or wood floors.
- It can be used as an insecticide both inside and outside of the house if sprayed directly on insects.
- It can rid your garden of aphids and can be sprayed directly on the plant with no harmful residue.
- It is great for pets! Use as an anti-flea treatment for both dogs and cats.
- It can be used as a spray-on treatment to help ward off outside pests such as ticks for both people and pets.
- Use it on car surfaces both inside and out.
