EFACOR™ meets the American Heart Association's entire recommendation for **DAILY** Omega-3 intake with **JUST 2** softgels!

Research Supports the Daily Use of Omega-3 EPA & DHA for Body Function

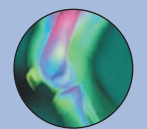

Cardiovascular

Research shows that consumption of **EPA and DHA** Omega-3 fatty acids **support healthy cardiovascular function.*** The **American Heart Association (AHA)** recommends the daily dietary intake of **Omega-3 essential fatty acids EPA and DHA at 1,000 mg per day for cardiovascular support.***

Brain/Neurologic

The support of **cognitive function and neurologic function** by the Omega-3 fatty acids **EPA and DHA** is supported in multiple research studies.* In addition, Omega-3 fatty acids have been shown to support **proper mood and emotion.***

Joint/Immune

Omega-3 fatty acids, especially **EPA**, support **joint function** in the body.* Due to their impact on lipid membranes, they also promote normal balance in the body's **immune pathways and responses.***

Vision

The Omega-3s **EPA and DHA** have been found to help support the **macula and retina of the eye.*** In addition, support of **normal lubrication of ocular structures** has been indicated.*

Weight Management

When used in combination with a healthy diet and exercise programme, research has shown Omega-3 fatty acids to enhance the body's ability to address metabolism and **support a proper weight.***

The Ideal Combination:

Antioxidants + Omega-3s

There is an ideal synergy between antioxidants and essential fatty acids. Antioxidants help **PROTECT** the valuable characteristics of healthy oils, so those oils don't oxidize under stress. If you are consuming concentrated Omega-3s (like EFACOR), you should also be using a concentrated antioxidant (like VIBE®) on a daily basis.*

Not only does VIBE provide the body with a solid nutritional foundation, it is antioxidant ORAC certified.†

†Brunswick Labs ORAC Certified, 2007.
