

EFACOR™

The Leader in Prescription Potency Omega-3 Essential Fatty Acids

Helps to reduce serum triglycerides and support cardiovascular health

Helps reduce the pain of rheumatoid arthritis

(In conjunction with conventional therapy at a dosage of 4 EFACOR™ softgels daily)

- Doctor Recommended
- 1,000 mg of EPA + DHA/serving
- Pharmaceutical purity
- Prescription potency
- **NO fishy smell or taste!**
- Exceptional lemon-lime taste
- Easy to swallow softgels
- Concentrated levels of EPA + DHA: the most recognized health benefiting Omega-3s
- Ultra-Pure
- Independently tested
- **Available without a prescription**

Helps to reduce serum triglycerides and support cardiovascular health

Medicinal Ingredients: (per 2 softgels)

Omega-3 fatty acids (concentrated from herring, sardine, anchovy): 1,120 mg

Containing:

EPA [eicosapentaenoic acid] 680 mg
DHA [docosahexanoic acid] 340 mg
Other Omega-3s (including DPA/ETA) 100 mg

Non-Medicinal Ingredients:

Softgel capsule (gelatin, glycerin and purified water)
Natural lemon and lime flavor
Rosemary extract
Ascorbyl palmitate
Natural tocopherols

Recommended Dose:

Adults: 2 softgels daily, preferably 10 minutes before a meal. It is recommended to not exceed 8 softgels daily.

Children (4+): 1 softgel daily.

EFACOR™ meets the American Heart Association's entire recommendation for DAILY Omega-3 intake with JUST 2 softgels!

Research Supports the Daily Use of Omega-3 EPA & DHA to Reach Multiple Health Goals

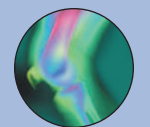

Cardiovascular Health

Research shows that consumption of EPA and DHA Omega-3 fatty acids **help to reduce serum triglycerides/triacylglycerols and help support cardiovascular health.** As such, the **American Heart Association (AHA) recommends the daily dietary intake of Omega-3 essential fatty acids EPA and DHA at 1,000 mg per day for cardiovascular health.**

Brain/Neurologic Health

The Omega-3 fatty acids EPA and DHA are supported in multiple research studies which have been shown to **help support cognitive health/brain function as well as the development of the brain, eyes and nerves.** In addition, Omega-3 fatty acids have been shown to support the health of **mood and emotion.***

Joint/Immune Health

Omega-3 fatty acids, especially EPA, support joint health in the body. **A dosage of 4 EFACOR softgels daily in conjunction with conventional therapy helps reduce the pain of rheumatoid arthritis.** The impact of Omega-3 fatty acids on lipid membranes also promote normal and healthy balance in the body's **immune pathways and responses.***

Vision Health

The Omega-3s EPA and DHA have been found to help support the health of the **macula and retina of the eye.*** In addition, support of healthy and normal **lubrication of ocular structures** has been indicated.*

The Ideal Combination: Antioxidants + Omega-3s

There is an ideal synergy between antioxidants and essential fatty acids. Antioxidants help **PROTECT** the valuable characteristics of healthy oils, so those oils don't oxidize under stress. If you are consuming concentrated Omega-3s (like EFACOR), you should also be using a potent antioxidant (like VIBE) on a daily basis.

Not only does VIBE® provide the body with a solid nutritional foundation, it is antioxidant ORAC certified.
